Hay needed August 1, 1988 - December 31, 1988: 550 bales

Straw needed August 1, 1988 - December 31, 1988: 900 bales

HAY and STRAW

The Fort Wayne Children's Zoo uses alfalfa, usually second and third cutting, also some Timothy and orchard hay especially when alfalfa is scarce. Giraffes always receive alfalfa. They must receive alfalfa of at least 15% protein on an "as delivered" basis or they will suffer from fat atrophy.

Our supplier must also be willing to store not only the hay but straw since storage at the zoo is minimal (can store less than 100 of each). It must be delivered frequently and at times under short notice. The hay cannot be moldy or dusty! The hay and straw must be in bales and tied with twine, and not wire.

I suggest strongly that we contract now for the whole year since hay may be scarce this year. At present hay is already being delivered from the south to our local dairy farmers.

We have been dealing with a supplier who knows our needs and grows enough hay for our use. He does not sell to others although others have offered him double what we were paying. He cuts the product at the right time to guarantee the correct nutriments. He also stores it for us in his barn and delivers as we need it. We have found no one who can match or is willing to match all our requirements! This supplier is close to the zoo, stops in frequently to check on our needs.

We highly recommend continuing purchasing hay and straw from this vendor:
